

TABLE OF CONTENTS

Purpose & Introduction

PART I. BASIC THEORY

1. Outline of the Furnace Building Project	9
2. Basic Definitions	11
3. Heat Content of Molten Metal	15
4. Types and Efficiencies of Furnaces	19
5. Principles of Combustion	23
6. Properties of Flames	31
7. Properties of Oil	39
8. Combustion Devices for Oil	40
9. Combustion devices for Gas	45
10. Propane Vaporization Rates	47
11. Wire Rope	52

PART II. DESIGNING THE TILTING FURNACE

13. The Burner System	56
14. The Crucible	67
15. The Tilting Mechanism	71
16. The Oil Tank	79
17. Air Supply and Blowers	81
18. Construction of the Test Equipment	83
19. Calculation of Airflow	87
20. Designing Centrifugal Fans	91

PART III. CONSTRUCTION OF THE FURNACE

21. Construction of Centrifugal fans	101
22. Circle Cutter	119
23. Building the Tilting Furnace	121
24. Building the Oil Tank	162
25. Operation of the Furnace	171
26. The Refueling Tank	175
27. Miscellaneous Topics	177

PART IV. MELTING PRACTICE

28. Melting Aluminum in the Foundry	179
29. Conclusion	185
30. Bibliography	187
31. Suppliers	189
Index	191
